

1

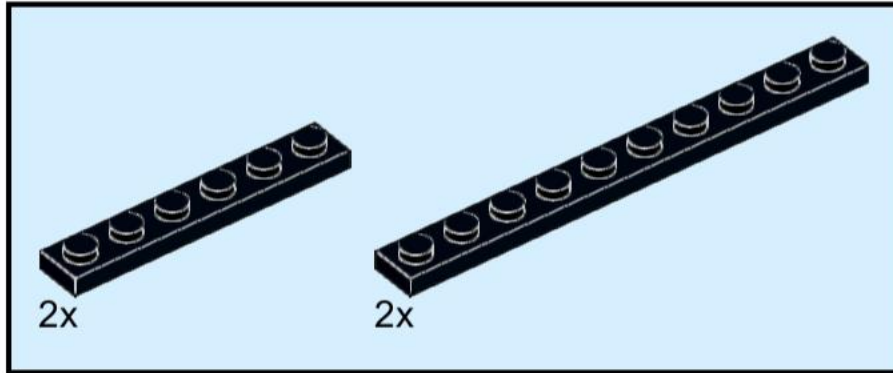

The following instructions are for just the tree to the left of side of the Upside Down set.

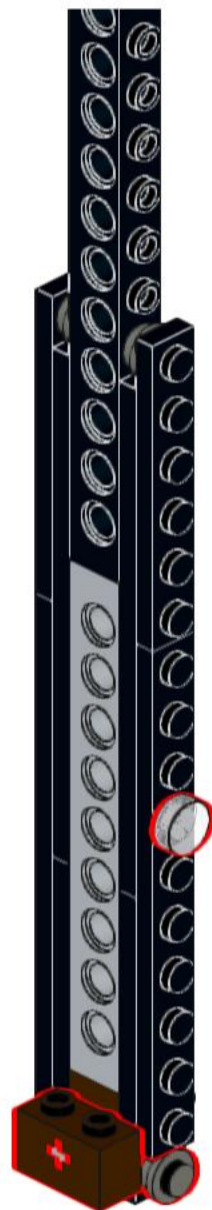

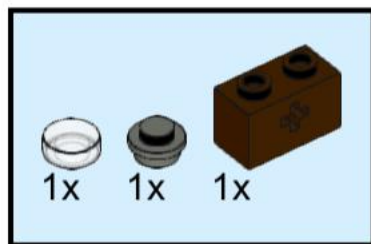

These instructions mirror the official instructions without the addition of foliage, so keep the official instructions handy to follow along as you build this.

Build one tree as depicted starting in step 250 of the official instructions.

Note: the gray 1x4 and 1x6 blocks are added to provide additional support/coverage to the Upside Down Castle Byers model that will be attached later

It is here where I would go ahead and attach Castle Byers (Upside Down) to the gray 1x4/1x6 bricks and the black 1x2 bricks.

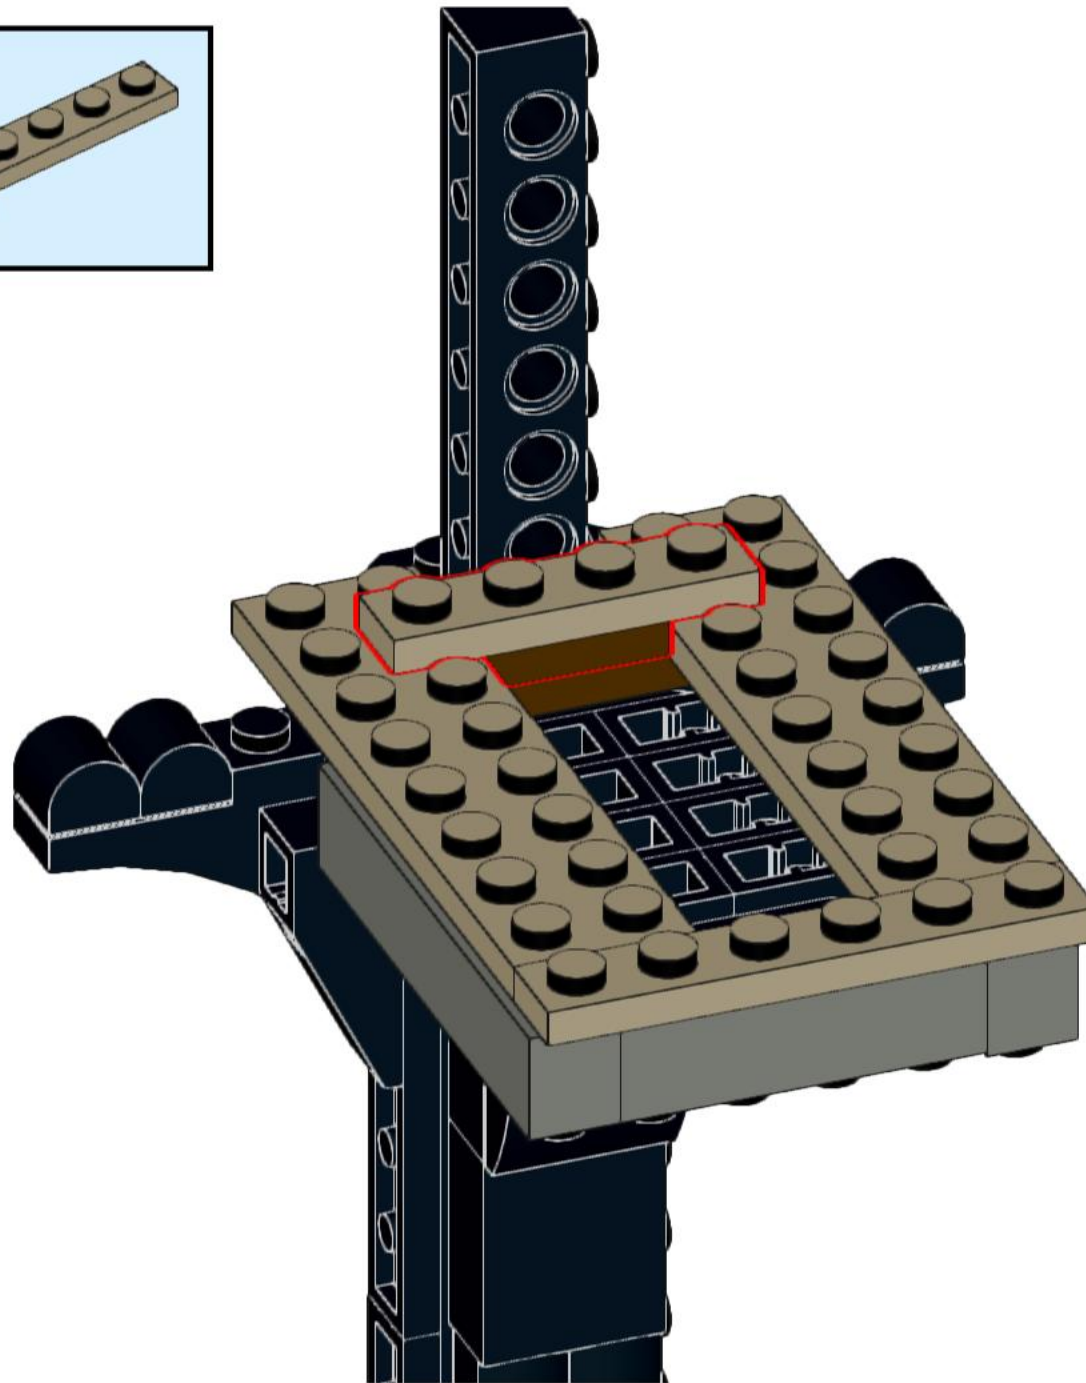

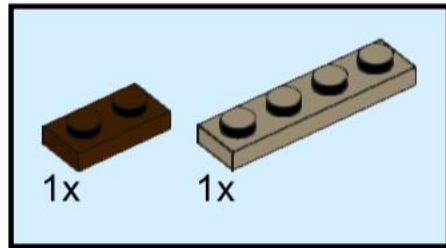

27

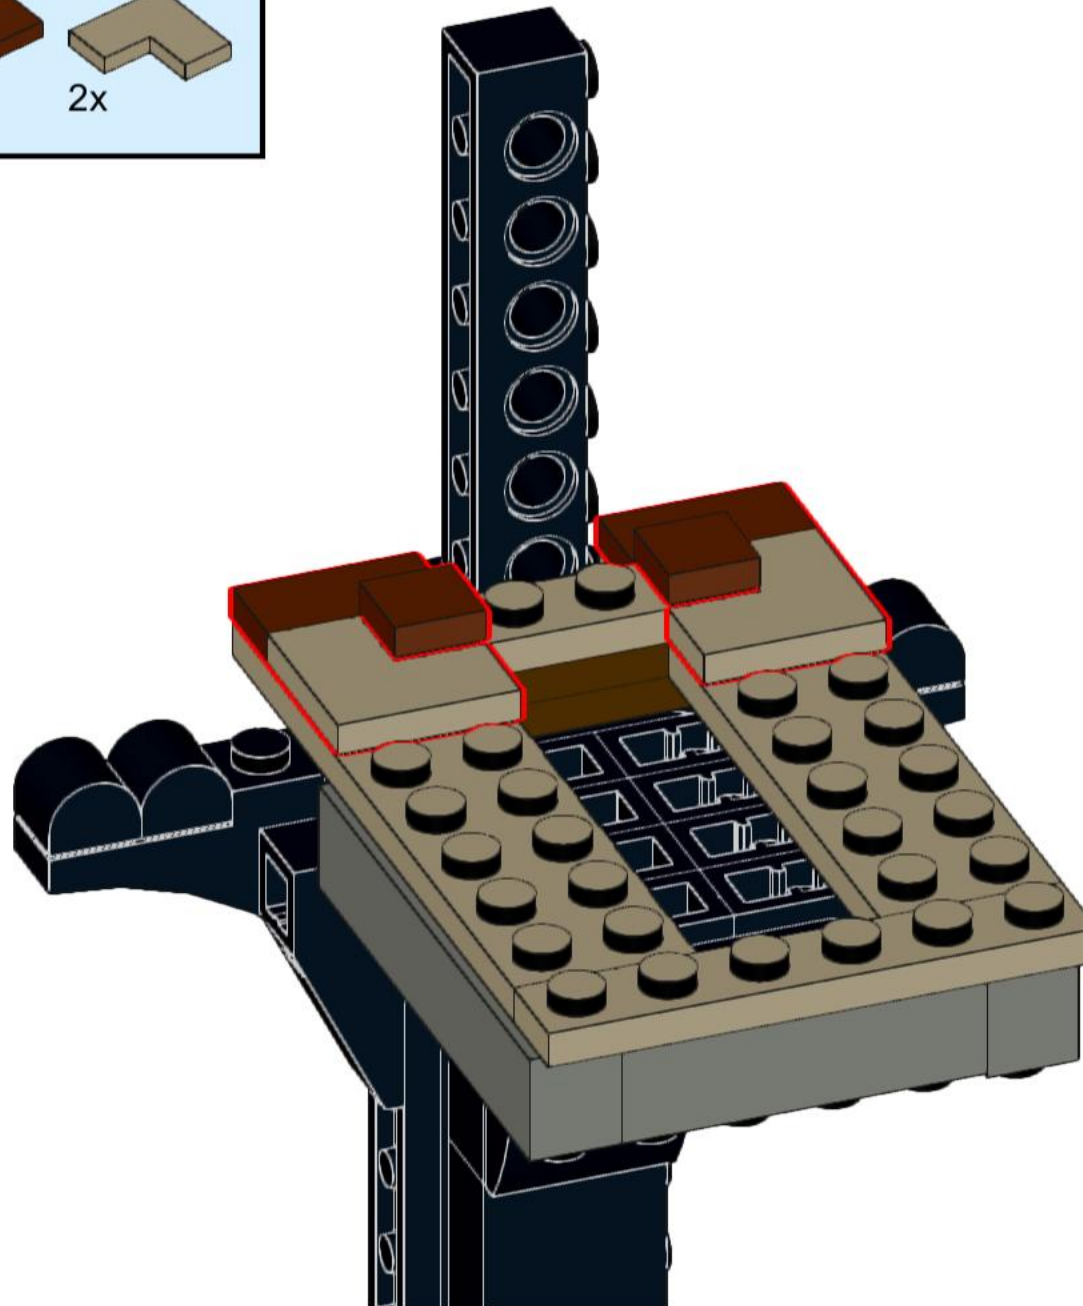

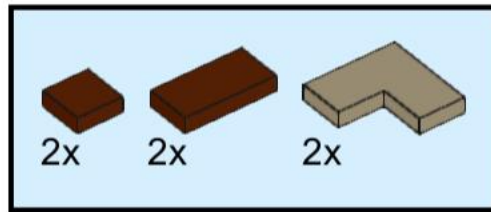

1x6 plate will be present to provide additional support for topside castle buyers model.

33

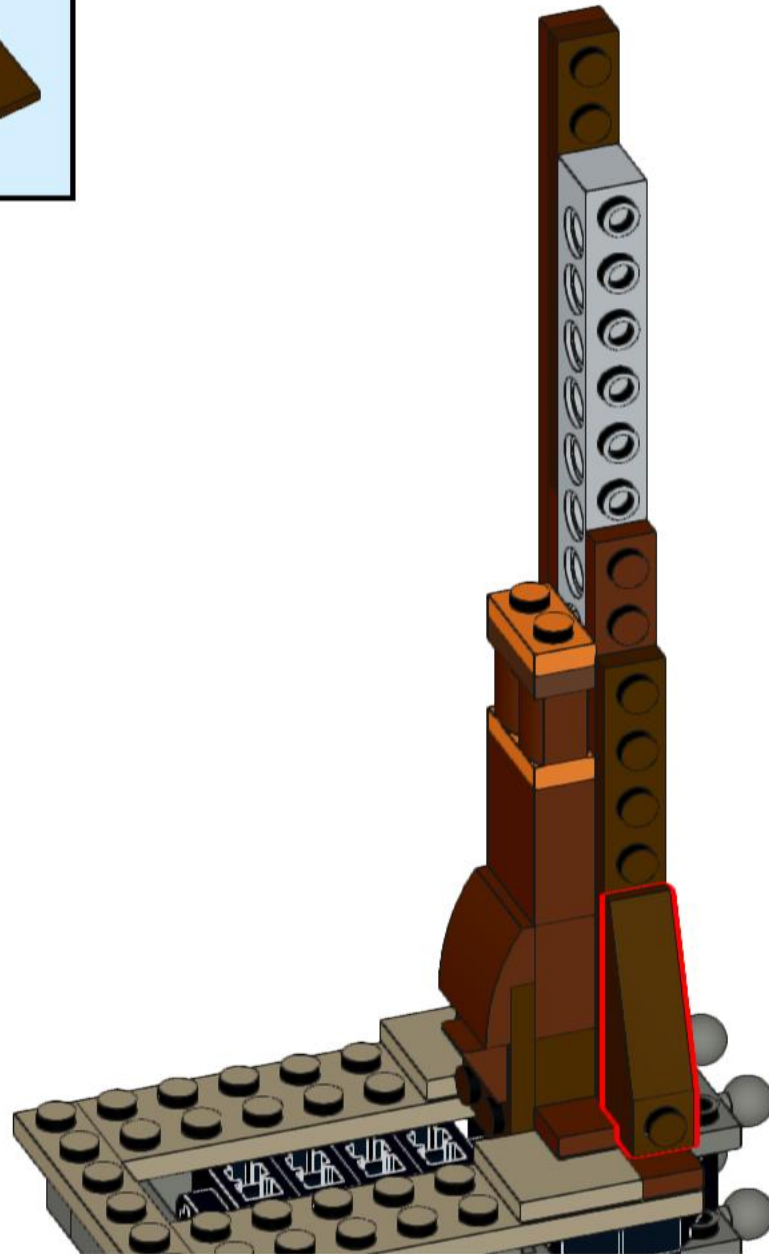

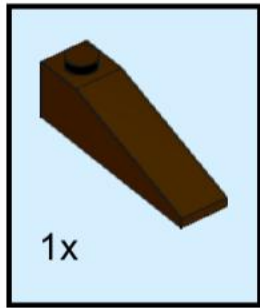

I would recommend attaching the topside Castle Byers to the tan plate prior to continuing on to the next step.

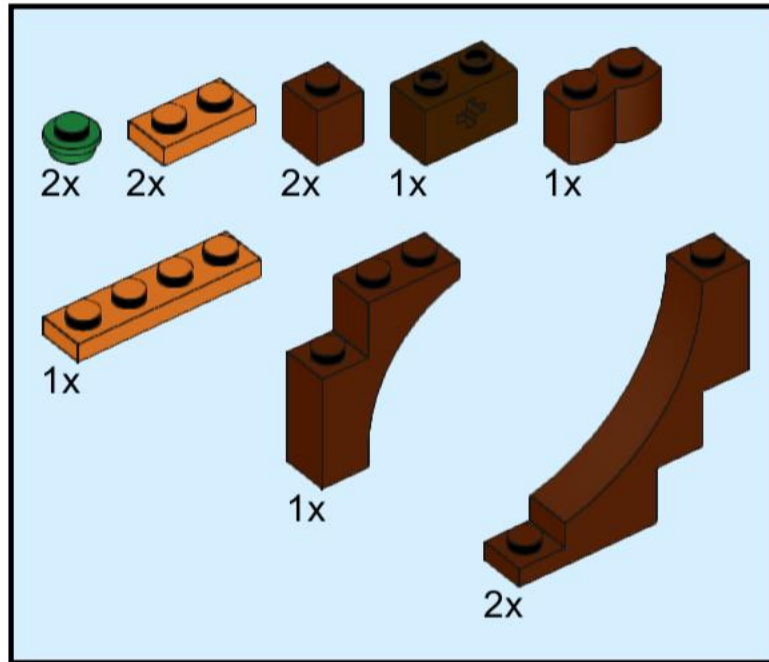

34

35

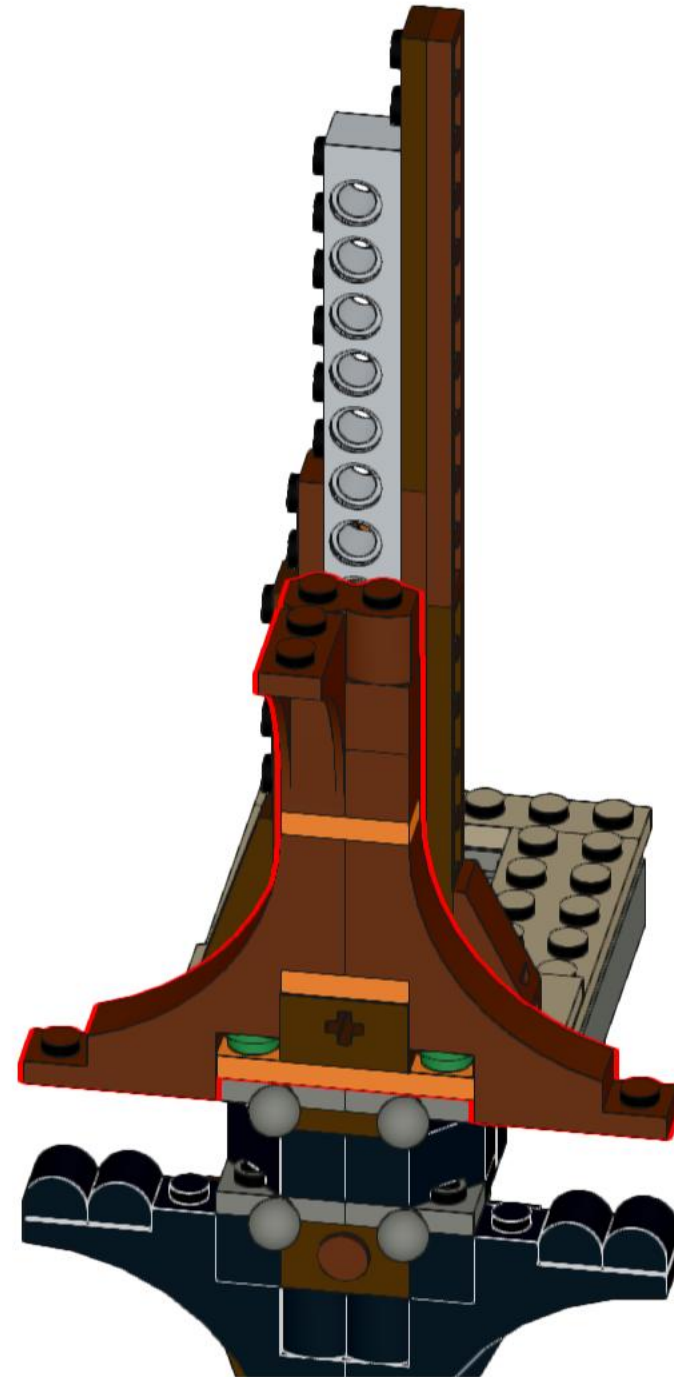

36

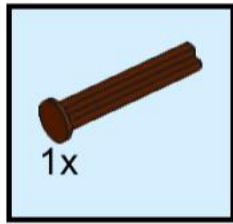

BEFORE YOU START THIS STEP

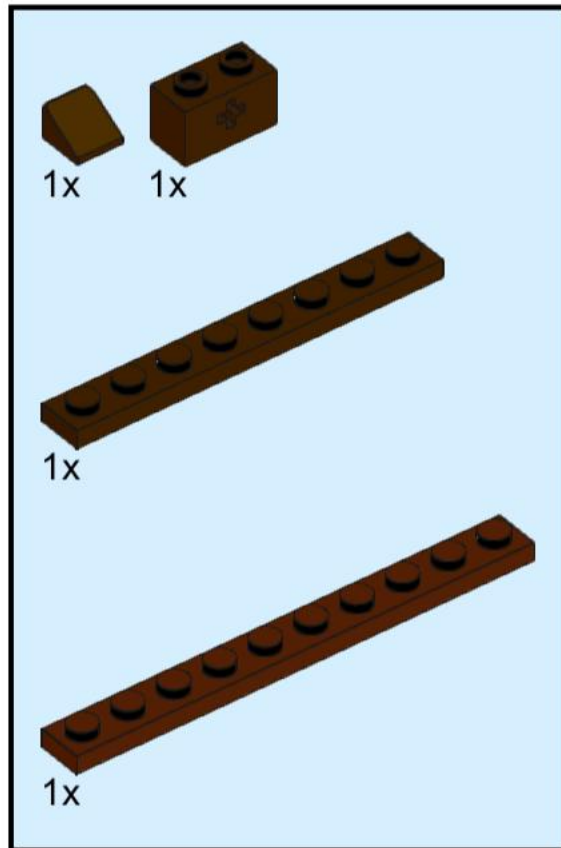

Go ahead and attach the current tree structure to the existing landscape as seen in step 314 of the official instructions by the 4x 1x2 plate with tow balls. When you complete this step, the arch pieces in sthis step will sandwich the the top and bottom halves of the tree into place.
